INDEX TO VOLUME 127

Alphabetical Table of Contents of Authors

ABRAHAMSON, WARREN G. See ARTHUR E. WEIS

ALATALO, RAUNO V., LARS GUSTAFSSON, and ARNE LUNDBERG. Do females prefer older males in polygynous bird species? 241

———. Interspecific competition and niche changes in tits (*Parus* spp.): evaluation of nonexperimental data, 819

ALBANO, STEPHEN S. See WALTER D. KOENIG

ANDERSON, KARL. See SCOTT FERSON

BARTALON, JAMES. See LUTHER BROWN

BAZZAZ, FAKHRI A. See DAVID C. HARTNETT

BELSKY, A. J. Does herbivory benefit plants? A review of the evidence, 870

BOAKE, CHRISTINE R. B. A method for testing adaptive hypotheses of mate choice, 654

BOGAR, ANNE E. See DENNIS NYBERG

BOGGS, CAROL L. See PAIGE SPRINGER

BORTOLOTTI, GARY R. Influence of sibling competition on nestling sex ratios of sexually dimorphic birds, 495

BOWEN, BONNIE S. See ROLF R. KOFORD

BROWN, JOEL S., and D. LAWRENCE VENABLE. Evolutionary ecology of seed-bank annuals in temporally varying environments, 31

BROWN, LUTHER, and JAMES BARTALON. Behavioral correlates of male morphology in a horned beetle, 565

BURLEY, NANCY. Sexual selection for aesthetic traits in species with biparental care, 415

CHAPIN, F. STUART, III, PETER M. VITOUSEK, and KEITH VAN CLEVE. The nature of nutrient limitation in plant communities, 48

CHAZDON, ROBIN L. The costs of leaf support in understory palms: economy versus safety, 9

CHESSON, PETER L., and WILLIAM W. MURDOCH. Aggregation of risk: relationships among host-parasitoid models, 696

COLE, KENNETH L. In defense of inertia, 727

DIAL, BENJAMIN E. Tail display in two species of iguanid lizards: a test of the "predator signal" hypothesis, 103

DIXON, A. F. G. The distribution of aphid infestation in relation to the demography of plant parts: a reply, 410

DOWNEY, PAT. See SCOTT FERSON

DUNBRACK, ROBERT L. See MALCOLM A. RAMSAY

DUNGAN, MICHAEL L. Three-way interactions: barnacles, limpets, and algae in a Sonoran desert rocky intertidal zone, 292

EHRLICH, PAUL R., and DARRYL WHEYE. "Nonadaptive" hilltopping behavior in male checkerspot butterflies (*Euphydryas editha*), 477

ELLSTRAND, NORMAN C. See DIANE L. MARSHALL and N. C. ELLSTRAND

EMERSON, SHARON B. Heterochrony and frogs: the relationship of a life history trait to morphological form, 167

EMLEN, JOHN MERRITT. See STEPHEN T. EMLEN

EMLEN, JOHN T. Land-bird densities in matched habitats on six Hawaiian islands: a test of resource-regulation theory, 125

EMLEN, STEPHEN T., JOHN MERRITT EMLEN, and SIMON A. LEVIN. Sex-ratio selection in species with helpers-at-the-nest, 1

FELDMAN, MARCUS W. See JOEL R. PECK

FELSENSTEIN, JOSEPH. Population differences in quantitative characters and gene frequencies: a comment on papers by Lewontin and Rogers, 731

FERSON, SCOTT, PAT DOWNEY, PAUL KLERKS, MARC WEISSBURG, IRWIN

KROOT, STEVEN STEWART, GEOFF JACQUEZ, JAMES SSEMAKULA, RICHARD MALENKY, and KARL ANDERSON. Competing reviews, or why do Connell and Schoener disagree? 571
FITZGERALD, RANDALL W. See STEVEN J. C. GAULIN
FOWLER, NORMA L. See DIANE L. MARSHALL et al.

GALEN, C., J. A. SHYKOFF, and R. C. PLOWRIGHT. Consequences of stigma receptivity in schedules for sexual selection in flowering plants, 462
GAULIN, STEVEN J. C., and RANDALL W. FITZGERALD. Sex differences in spatial ability: an evolutionary hypothesis and test, 74
GITTLEMAN, JOHN L. Carnivore life history patterns: allometric, phylogenetic, and ecological associations, 744
GORDON, C. See D. W. STEPHENS
GOSLING, L. M. Biased sex ratios in stressed animals, 893
———. Selective abortion of entire litters in the coypu: adaptive control of offspring production in relation to quality and sex, 772
GRAY, LINCOLN, and JOHN A. KING. The use of multidimensional scaling to determine principal resource axes, 577
GREIG-SMITH, P. W. Bicolored fruit displays and frugivorous birds: the importance of fruit quality to dispersers and seed predators, 246
GRIFFITHS, DAVID. Size-abundance relations in communities, 140
GUSTAFSSON, LARS. See RAUNO V. ALATALO

HAIRSTON, NELSON G., SR. Species packing in *Desmognathus* salamanders: experimental demonstration of predation and competition, 266
HARTNETT, DAVID C., and FAKHRI A. BAZZAZ. Leaf demography and plant-insect interactions: a further comment, 561
HEYWOOD, JOHN S. The effect of plant size variation on genetic drift in populations of annuals, 851
HOUSTON, ALASDAIR I. See JOHN M. MCNAMARA

JACQUEZ, GEOFF. See SCOTT FERSON
JAENIKE, JOHN. Feeding behavior and future fecundity in *Drosophila*, 118
JAMIESON, IAN G. The functional approach to behavior: is it useful? 195

KEDDY, PAUL A. See SCOTT D. WILSON
KENCE, AYKUT. Spurious frequency-dependent fitness in *Drosophila*: an artifact caused by marking procedures, 716
KING, JOHN A. See LINCOLN GRAY
KIRKPATRICK, MARK. The handicap mechanism of sexual selection does not work, 222
KLERKS, PAUL. See SCOTT FERSON
KNIGHT, DENNIS H. See WILLIAM H. ROMME
KOENIG, WALTER D., and STEPHEN S. ALBANO. On the measurement of sexual selection, 403
KOFORD, ROLF R., BONNIE S. BOWEN, and SANDRA L. VEHRENCAMP. Habitat saturation in groove-billed anis (*Crotophaga sulcirostris*), 317
KROOT, IRWIN. See SCOTT FERSON

LAWSON, ELLEN C. See DAVID E. MCCAULEY
LEVIN, DONALD A. See DIANE L. MARSHALL et al.
LEVIN, SIMON A. See STEPHEN T. EMLEN
LEWIS, WILLIAM M., JR. Evolutionary interpretations of allelochemical interactions in phytoplankton algae, 184
LEWONTIN, R. C. A comment on the comments of Rogers and Felsenstein, 733
LUNDBERG, ARNE. See RAUNO V. ALATALO
LYNCH, J. F. See D. W. STEPHENS

MALENKY, RICHARD. See SCOTT FERSON
MARKGRAF, VERA. Plant inertia reassessed, 725
MARSHALL, DIANE L., and NORMAN C. ELLSTRAND. Sexual selection in *Raphanus sativus*: experimental data on nonrandom fertilization, maternal choice, and consequences of multiple paternity, 446
MARSHALL, DIANE L., DONALD A. LEVIN, and NORMA L. FOWLER. Plasticity of yield components in response to stress in *Sesbania macrocarpa* and *Sesbania vesicaria* (Leguminosae), 508
MCCAULEY, DAVID E., and ELLEN C. LAWSON. Mating reduces predation on male milkweed beetles, 112
MCNAMARA, JOHN M., and ALASDAIR I. HOUSTON. The common currency for behavioral decisions, 358

MEFFE, GARY K. Cannibalism, food availability, and reproduction in mosquitofish: a critique, 897
MILLIGAN, BROOK G. Punctuated evolution induced by ecological change, 522
MITCHELL-OLDS, THOMAS, and J. J. RUTLEDGE. Quantitative genetics in natural plant populations: a review of the theory, 379
MURDOCH, WILLIAM W. See PETER L. CHESSON

NYBERG, DENNIS, and ANNE E. BOGAR. Genotypic and subgenotypic variation in heavy-metal tolerance in *Paramecium*, 615

PECK, JOEL R., and MARCUS W. FELDMAN. The evolution of helping behavior in large, randomly mixed populations, 209
PLOWRIGHT, R. C. See C. GALEN
PROUT, TIMOTHY. The delayed effect on fertility of preadult competition: two-species population dynamics, 809

RAMSAY, MALCOLM A., and ROBERT L. DUNBRACK. Physiological constraints on life history phenomena: the example of small bear cubs at birth, 735
REINERS, WILLIAM A. Complementary models for ecosystems, 59
ROGERS, ALAN R. Population differences in quantitative characters as opposed to gene frequencies, 729
ROMME, WILLIAM H., DENNIS H. KNIGHT, and JOSEPH B. YAVITT. Mountain pine beetle outbreaks in the Rocky Mountains: regulators of primary productivity? 484
RUTBERG, ALLEN T. Lactation and fetal sex ratios in American bison, 89
RUTLEDGE, J. J. See THOMAS MITCHELL-OLDS

SAMSON, DOUGLAS A., and KENNETH S. WERK. Sex-dependent effects in the analysis of reproductive effort in plants, 667
SAUER, JOHN R., and NORMAN A. SLADE. Size-dependent population dynamics of *Microtus ochrogaster*, 902
SCHLUTER, DOLPH. Character displacement between distantly related taxa? Finches and bees in the Galápagos, 95
SHYKOFF, J. A. See C. GALEN
SILVERTOWN, JONATHAN. "Biennials": a reply to Kelly, 721
SLADE, NORMAN A. See JOHN R. SAUER
SLOBODKIN, L. B. The role of minimalism in art and science, 257
SOBERÓN M., JORGE. The relationship between use and suitability of resources and its consequences to insect population size, 338
SORENSEN, A. E. See D. W. STEPHENS
SPILLER, DAVID A. Consumptive-competition coefficients: an experimental analysis with spiders, 604
SPRINGER, PAIGE, and CAROL L. BOGGS. Resource allocation to oocytes: heritable variation with altitude in *Colias philodice eriphyle* (Lepidoptera), 252
SSEMAKULA, JAMES. See SCOTT FERSON
STEPHENS, D. W., J. F. LYNCH, A. E. SORENSEN, and C. GORDON. Preference and profitability: theory and experiment, 533
STEWART, STEVEN. See SCOTT FERSON
SUGIHARA, GEORGE. Shuffled sticks: on calculating nonrandom niche overlaps, 554

TURELLI, MICHAEL. See DAVID SLOAN WILSON

VAN CLEVE, KEITH. See F. STUART CHAPIN
VAN DEN BERG, M. J. A model for *Drosophila melanogaster* mating behavior, 796
VEHRENCAMP, SANDRA L. See ROLF R. KOFORD
VENABLE, D. LAWRENCE. See JOEL S. BROWN
VITOUSEK, PETER M. See F. STUART CHAPIN

WASER, NICKOLAS M. Flower constancy: definition, cause, and measurement, 593
WATT, WARD B. Power and efficiency as indexes of fitness in metabolic organization, 629
WEIS, ARTHUR E., and WARREN G. ABRAHAMSON. Evolution of host-plant manipulation by gall makers: ecological and genetic factors in the *Solidago-Eurosta* system, 681
WEISSBURG, MARC. See SCOTT FERSON
WERK, KENNETH S. See DOUGLAS A. SAMSON

WHEYE, DARRYL. See PAUL R. EHRLICH
WILSON, DAVID SLOAN, and MICHAEL TURELLI. Stable underdominance and the evolutionary invasion of empty niches, 835
WILSON, SCOTT D., and PAUL A. KEDDY. Measuring diffuse competition along an environmental gradient: results from a shoreline plant community, 862
YAVITT, JOSEPH B. See WILLIAM H. ROMME

Alphabetical Table of Contents of Titles

Aggregation of risk: relationships among host-parasitoid models. Peter L. Chesson and William W. Murdoch, 696

Behavioral correlates of male morphology in a horned beetle. Luther Brown and James Bartalon, 565
Biased sex ratios in stressed animals. L. M. Gosling, 893
Bicolored fruit displays and frugivorous birds: the importance of fruit quality to dispersers and seed predators. P. W. Greig-Smith, 246
"Biennials": a reply to Kelly. Jonathan Silvertown, 721

Cannibalism, food availability, and reproduction in mosquitofish: a critique. Gary K. Meffe, 897
Carnivore life history patterns: allometric, phylogenetic, and ecological associations. John L. Gittleman, 744
Character displacement between distantly related taxa? Finches and bees in the Galápagos. Dolph Schluter, 95
A comment on the comments of Rogers and Felsenstein. R. C. Lewontin, 733
The common currency for behavioral decisions. John M. McNamara and Alasdair I. Houston, 358
Competing reviews, or why do Connell and Schoener disagree? Scott Ferson, Pat Downey, Paul Klerks, Marc Weissburg, Irwin Kroot, Steven Stewart, Geoff Jacquez, James Ssemakula, Richard Malenky, and Karl Anderson, 571
Complementary models for ecosystems. William A. Reiners, 59
Consequences of stigma receptivity in schedules for sexual selection in flowering plants. C. Galen, J. A. Shykoff, and R. C. Plowright, 462
Consumptive-competition coefficients: an experimental analysis with spiders. David A. Spiller, 604
The costs of leaf support in understory palms: economy versus safety. Robin L. Chazdon, 9

The delayed effect on fertility of preadult competition: two-species population dynamics. Timothy Prout, 809
The distribution of aphid infestation in relation to the demography of plant parts: a reply. A. F. G. Dixon, 410
Does herbivory benefit plants? A review of the evidence. A. J. Belsky, 870
Do females prefer older males in polygynous bird species? Rauno V. Alatalo, Lars Gustafsson, and Arne Lundberg, 241

The effect of plant size variation on genetic drift in populations of annuals. John S. Heywood, 851
Evolutionary ecology of seed-bank annuals in temporally varying environments. Joel S. Brown and D. Lawrence Venable, 31
Evolutionary interpretations of allelochemical interactions in phytoplankton algae. William M. Lewis, Jr., 184
The evolution of helping behavior in large, randomly mixed populations. Joel R. Peck and Marcus W. Feldman, 209
Evolution of host-plant manipulation by gall makers: ecological and genetic factors in the *Solidago-Eurosta* system. Arthur E. Weis and Warren G. Abrahamson, 681

Feeding behavior and future fecundity in *Drosophila*. John Jaenike, 118
Flower constancy: definition, cause, and measurement. Nickolas M. Waser, 593
The functional approach to behavior: is it useful? Ian G. Jamieson, 195

Genotypic and subgenotypic variation in heavy-metal tolerance in *Paramecium*. Dennis Nyberg and Anne E. Bogar, 615

Habitat saturation in groove-billed anis (*Crotophaga sulcirostris*). Rolf R. Koford, Bonnie S. Bowen, and Sandra L. Vehrencamp, 317
The handicap mechanism of sexual selection does not work. Mark Kirkpatrick, 222
Heterochrony and frogs: the relationship of a life history trait to morphological form. Sharon B. Emerson, 167

In defense of inertia. Kenneth L. Cole, 727
Influence of sibling competition on nestling sex ratios of sexually dimorphic birds. Gary R. Bortolotti, 495
Interspecific competition and niche changes in tits (*Parus* spp.): evaluation of nonexperimental data. Rauno V. Alatalo, Lars Gustafsson, and Arne Lundberg, 819

Lactation and fetal sex ratios in American bison. Allen T. Rutberg, 89
Land-bird densities in matched habitats on six Hawaiian islands: a test of resource-regulation theory. John T. Emlen, 125
Leaf demography and plant-insect interactions: a further comment. David C. Hartnett and Fakhri A. Bazzaz, 561

Mating reduces predation on male milkweed beetles. David E. McCauley and Ellen C. Lawson, 112
Measuring diffuse competition along an environmental gradient: results from a shoreline plant community. Scott D. Wilson and Paul A. Keddy, 862
A method for testing adaptive hypotheses of mate choice. Christine R. B. Boake, 654
A model for *Drosophila melanogaster* mating behavior. M. J. Van den Berg, 796
Mountain pine beetle outbreaks in the Rocky Mountains: regulators of primary productivity? William H. Romme, Dennis H. Knight, and Joseph B. Yavitt, 484

The nature of nutrient limitation in plant communities. F. Stuart Chapin III, Peter M. Vitousek, and Keith Van Cleve, 48
"Nonadaptive" hilltopping behavior in male checkerspot butterflies (*Euphydryas editha*). Paul R. Ehrlich and Darryl Wheye, 477

On the measurement of sexual selection. Walter D. Koenig and Stephen S. Albano, 403

Physiological constraints on life history phenomena: the example of small bear cubs at birth. Malcolm A. Ramsay and Robert L. Dunbrack, 735
Plant inertia reassessed. Vera Markgraf, 725
Plasticity of yield components in response to stress in *Sesbania macrocarpa* and *Sesbania vesicaria* (Leguminosae). Diane L. Marshall, Donald A. Levin, and Norma L. Fowler, 508
Population differences in quantitative characters and gene frequencies: a comment on papers by Lewontin and Rogers. Joseph Felsenstein, 731
Population differences in quantitative characters as opposed to gene frequencies. Alan R. Rogers, 729
Power and efficiency as indexes of fitness in metabolic organization. Ward B. Watt, 629
Preference and profitability: theory and experiment. D. W. Stephens, J. F. Lynch, A. E. Sorensen, and C. Gordon, 533
Punctuated evolution induced by ecological change. Brook G. Milligan, 522

Quantitative genetics in natural plant populations: a review of the theory. Thomas Mitchell-Olds and J. J. Rutledge, 379

The relationship between use and suitability of resources and its consequences to insect population size. Jorge Soberón M.. 338

Resource allocation to oocytes: heritable variation with altitude in *Colias philodice eriphyle* (Lepidoptera). Paige Springer and Carol L. Boggs, 252
The role of minimalism in art and science. L. B. Slobodkin, 257

Selective abortion of entire litters in the coypu: adaptive control of offspring production in relation to quality and sex. L. M. Gosling, 772
Sex differences in spatial ability: an evolutionary hypothesis and test. Steven J. C. Gaulin and Randall W. FitzGerald, 74
Sex-ratio selection in species with helpers-at-the-nest. Stephen T. Emlen, John Merritt Emlen, and Simon A. Levin, 1
Sexual selection for aesthetic traits in species with biparental care. Nancy Burley, 415
Sexual selection in *Raphanus sativus*: experimental data on nonrandom fertilization, maternal choice, and consequences of multiple paternity. Diane L. Marshall and Norman C. Ellstrand, 446
Shuffled sticks: on calculating nonrandom niche overlaps. George Sugihara, 554
Size-abundance relations in communities. David Griffiths, 140
Size-dependent effects in the analysis of reproductive effort in plants. Douglas A. Samson and Kenneth S. Werk, 667
Size-dependent population dynamics of *Microtus ochrogaster*. John R. Sauer and Norman A. Slade, 902
Species packing in *Desmognathus* salamanders: experimental demonstration of predation and competition. Nelson G. Hairston, Sr., 266
Spurious frequency-dependent fitness in *Drosophila*: an artifact caused by marking procedures. Aykut Kence, 716
Stable underdominance and the evolutionary invasion of empty niches. David Sloan Wilson and Michael Turelli, 835

Tail display in two species of iguanid lizards: a test of the "predator signal" hypothesis. Benjamin E. Dial, 103
Three-way interactions: barnacles, limpets, and algae in a Sonoran desert rocky intertidal zone. Michael L. Dungan, 292

The use of multidimensional scaling to determine principal resource axes. Lincoln Gray and John A. King, 577
